How to use this book

Glossary

Revelation 1 – The commitment of the spiritual masters

The spiritual masters communicate their responsibility for Earth on an intergalactic level in collaboration with Humanity. Every individual is jointly responsible for activating the Divine spark on Earth. Energetic forms of consciousness are a part of this process. The effect of the crucifixion of Jesus on Earth's aura. List of questions of the spiritual masters for getting people into a personal spiritual process to help them connect more easily with each other.

Revelation 2 – A choice for spiritual freedom

Mary Magdalene, Jesus and Mary talk about the Divine team of Humanity's spiritual helpers. People's choice between spiritual freedom and conditioning. The need dictated by their Personality to be unique isolates humans, removing this need unifies humans. Exercises with regard to the purpose of going through experiences during life on Earth.

Revelation 3 – Interaction with the Cosmos

Mary provides insight into Humanity's connection with the Cosmos. The manner in which humans function influences how the Cosmos functions and vice versa. Only when people bring personal and collective interests into balance and focus on love, care and compassion, are they able to make contact with extraterrestrial forms of consciousness. Prayer to experience Divinity in all forms of life.

Revelation 4 – Responsibility for own Divinity

Humanity's attention is drawn to the fact that it must assume responsibility for its own Divinity. People can become aware that they are the creators of their own reality. Jesus explains that we are all a trinity: every person is both father (creator), son (creation) and Holy Spirit (creative power). To make contact with the spiritual world, people are invited to pray. But what is a prayer? Mary Magdalene, Jesus and Mary provide essential prayers to invoke them. Mary explains in detail the significance of the prayer addressed to her.

Revelation 5 – Transformation of the victim/offender consciousness

Mary requests people's attention for the victim/offender consciousness and makes suggestions as to transformation. She makes herself available as a representative of compassion and as a spiritual guide in the individual transformation process whenever people pray for this. Exercise with respect to people's relationship with their personal ambitions and the impact of ambitions on everyone's lives.

Revelation 6 – Human life is like maintaining a garden

Mary Magdalene, Jesus and Mary draw people's attention to the fact that they should lead a life of awareness. They compare giving life content with maintaining a garden. Modern people have little thought for the inner self. People's ability to penetrate

their inner self in order to make contact with the spiritual aspect of themselves is an essential part of life. Exercise to become aware of shifting attention and its effects.

Revelation 7 – The five stages of human consciousness development

Mary Magdalene, Jesus and Mary draw people's attention to the five development stages in becoming aware of one's inner self. Exercises to help one recognise one's own stage of development.

Revelation 8 – Mary Magdalene explains who and what is God

Mary Magdalene presents herself from the spiritual world and tells what Jesus and Mary mean to her and what the reasons are for the publication of this book. Mary Magdalene explains what God is and provides the 'I am God' exercises and a prayer to let people experience their Divine essence and accept it into their heart.

Revelation 9 – Experience the Divine in the world

Mary provides exercises for people to experience the Divine in the world. The main cause of pain in people is the insufficient extent to which they experience the Divine in themselves and in the world. It is mainly thoughts, opinions and convictions that block out the Divine. To experience God in the world, Humanity must let go of its old assumptions and revere the world.

Revelation 10 – Deep longing for unity

People long most for unity. Thoughts, convictions and opinions create an involuntary illusion about the world and about ourselves. Jesus gives exercises to eliminate human's feeling of being cut off from the rest of the world. 'Love is the connective force that makes us aware of the unity between ourselves and the world.'

Revelation 11 – The essence of woman and man

Mary about Mary as a symbol of mother, wife and sister, about the essence of woman and man and the true nature of their interaction, about her relationship with Joseph as an example for Humanity. About the true meaning of the 'Immaculate Conception' and the role of the Holy Spirit. To conceive Jesus, Mary and Joseph did indeed have physical contact.

Revelation 12 – The holy meaning of giving and receiving

Mary Magdalene about the sacred meaning of menstruation, about men 'giving' and women 'receiving' as a crucial element in their relationship, about her loving partnership with Jesus that they want to reveal to the world and the significance that the two of them can have as a couple for every man and woman. Exercise to call up Mary Magdalene and Jesus in your heart.

Revelation 13 – The healing of the body of woman and man

Mary Magdalene gives exercises and prayers for the healing of the woman, for the healing of the emotional and mental body, for the healing of the relationship of the man with his physical body and for the restoration of the relationship with people with whom you have a negative connection.

Revelation 14 – Dealing with fear

Mary's exercises for solving fears.

Revelation 15 – The initiation of Humanity on Earth

Mary Magdalene and Jesus about the road to the consecration of humans on Earth. The first three of ten steps with accompanying exercises for breaking out of the illusion of being isolated, for putting the Personality into perspective and for restoring the love for oneself.

Revelation 16 - The road of emptiness and light

Mary Magdalene and Jesus discuss the next two steps on the road to the consecration of humans on Earth. About 'creating room, emptiness and silence' to come in contact with one's inner self and 'the road of light' with exercises to make people aware of their free will, enable them to make more conscious choices and to focus their attention in order to improve their consciousness. Someone's degree of consciousness determines the extent to which one exercises one's free will.

Revelation 17 – The road of freedom, heart opening, life and dead

Mary Magdalene and Jesus discuss the next three steps on the road to the consecration of humans on Earth. About a different view of the function of death as a road to freedom and about opening the heart. By opening the heart, both at an individual and a collective level, Earth becomes a source of enrichment for the Cosmos. The time is ripe for the big transformation, the transformation occurs in the heart. Exercises: 'Each day of your life is a movie', 'We love the Earth' and 'Beliefs about death'

Revelation 18 – The road of dying

Mary Magdalene and Jesus discuss the ninth step on the road to the consecration of humans on Earth. On preparing for death and the assistance of the spiritual world in this preparation, the transformation of consciousness on the way through the tunnel to the immaterial world and the development process that takes place there. Exercise to experience the process of dying.

Revelation 19 – The road of reincarnation

Mary Magdalene and Jesus discuss the tenth step on the road to the consecration of humans on Earth. Which process does the soul go through before it reincarnates in the material world? The soul can choose one of three lives. The soul chooses its new parents and brings about a lifelong commitment of the heart.

Exercise to become conscious of your own conception. Every child is wanted.

Revelation 20 – The true meaning of the crucifixion

Jesus explains the true meaning of the crucifixion and how he was called to it. He did not die for our sins. Being nailed to the cross was a consecration for the human heart at a level that was as yet unknown to Humanity. And the Earth was initiated into a higher state of consciousness that was and is unique in its own history and that of the entire Cosmos. Prayer and exercises to awaken the consciousness of Christ in the heart.

Revelation 21 – Embracing the Earth as a foundation for the Christ Project

In the course of the years to come, more and more people will move out of the cities in pursuit of peace and quiet and the nature of the countryside; this to escape from the head and into the heart. The spiritual masters unfold their plans for new residential and working communities called the ‘Christ Project’. The plans are centred on spiritual values and an environmentally friendly economy. Exercise for the integration of all people and other forms of consciousness to create a network of love and light.

Revelation 22 - Spiritual movements complement each other

The spiritual masters emphasise the personal transformation of the people who wish to participate in the Christ Project and the development of their consciousness. They explain that the various religions actually complement each other and will all have a place in the new community. “Do you think that Mohammed, Jesus, Buddha and Moses could be at variance with each other?” Exercise to accept other religions.

Revelation 23 - Basics of the Christ Project

The spiritual masters emphasise the importance of improved interaction between the 'highest' and 'lowest' chakras in our bodies in order to actually be able to experience the power of love and the Divine. Basic principles for participating in the Christ Project are formulated. Exercise to put negative opinions into perspective.

Revelation 24 - The relationship of parent and child

Mary and Jesus compare the parent/child relationship with the relationship between the spiritual masters and Humanity. If a parent fosters his or her inner child, that parent is also better able to give his or her child love and acknowledge that child as an individual soul. Humanity has achieved increased consciousness and reveals itself more and more as a partner of the spiritual masters. Exercise to make contact with your inner child and to accept it.

Revelation 25 - The relationship between spiritual masters and Humanity

Mary and Jesus talk about the special relationship between the spiritual masters and Humanity. The spiritual masters occasionally wonder whether they should 'save' people from the situations in life that they have created themselves or whether they should let them experience them to the full of the point of view of the evolutionary process. The answer is provided by the Divine plan. It is time for people to take responsibility for what they create and learn to make other choices. Humanity and the masters can then be partners. Exercise as an aid for consciously deciding whether or not you want to be a victim in this life.

About the Mary Magdalene and Jesus World School

Foreword by the Brotherhood and Sisterhood of Love and Light

Dear people on Earth, you may wonder who we are. We are a group of spiritual masters, both male and female, who have already experienced all human dilemmas of existence in countless incarnations and who have completed all learning phases on Earth as humans. We are able to look upon you with compassion from a broader perspective and a higher dimension, so that we can help you on both an individual and a collective level to build a bridge between your Divinity and your personalities in your various lives on Earth.

We have been incarnated in various cultures and at various times in the history of humans. We have experienced all the different aspects of human existence in several lives and have disengaged ourselves from them. We have outgrown human illusions and have raised ourselves above human experiences by experiencing and accepting them and by giving them their own place. We have discovered that the apparent happiness that every human experience offers is only temporary. True happiness lies in accepting who we are in essence, in radiating our Divinity and in our connection with the unconditional love of the heart. This is how we were able to disengage and become serene. This placed us above the duality of material, emotional, rational and other contrasts, above 'choosing sides', above 'having the last word'; it allowed us to accept all aspects of Earthly life and all human experiences. We are now full of compassion and joy, have let go of 'the struggle' and enjoy the Divine 'game', all manifestations of life on Earth and the human existence in particular. We are spiritual powers that represent various aspects of God. We were incarnated

once and recognised and acknowledged by you as Buddha, Lao Tse, Mary, Jesus, Mary Magdalene, Confucius, John, Rabbi Shimon, Sri Aurobindo, Zarathustra and many other masters.

We have waited a long time to make contact with Humanity in this way. We have inspired and guided you in the background from the spiritual world throughout the centuries. As your awareness grew, communication with you became increasingly stronger. The more you opened your hearts, the more you turned to us for inspiration and guidance. The more you turned to us, the more we were allowed to support you in finding the Divine spark in yourself.

Humanity has now reached the stage that it is able to take responsibility for its own Divinity, just like we and everything else that exists are Divine. We can enter into this new phase together with joy. It is a new period in which human takes centre stage, in which you will bring, to an increasing extent, the action and words of the heart into the material world. And you will more and more often proclaim and live up to the message of unconditional love and allow your love for yourself and others. This will result in a new order on Earth with ever greater and deeper love and fraternisation – love and fraternisation that are based on your love for yourself, or in other words, the healing of the individual that ultimately results in the healing of society. People can finally also love themselves. The love for yourself cures all the old spiritual wounds, which then no longer need to be projected and vented on society. If people feel peace and love in their hearts, peace and love will develop in society; this is an essential piece of the puzzle that may soon be whole. The healing of the individual, of the relationships with family and friends and of society will again enable this planet to connect more consciously with the Cosmic order to which Earth belongs. The fulfilment that this connection brings about will create a new wave of bliss on Earth inspiring the people to come

together in united awareness; the ultimate human experience of being Divine.

We, the Brotherhood and Sisterhood of Love and Light, of whom particularly Mary Magdalene, Jesus and Mary address you in this book, stand ready to give you even deeper, clearer and more devoted guidance in this phase, partly enabled by your personal growth. It is for this purpose that the three of them give you this book. Feel free to seek direct contact with them in stillness or in the passion of your heart. They can be approached at all times and in any way. You will feel their answer in your heart.

Humanity has arrived at a special time in its development. You are on the verge of discovering the illusion of duality. More and more people want to see the whole truth and are no longer satisfied with part of the truth. You no longer believe in a struggle against a possible evildoer and believe less and less in the existence of victims and offenders. Humanity is about to experience and to acknowledge its own Divinity and to take complete responsibility for all its own creations on Earth. This can be compared to the end of the adolescent phase after which one enters adulthood and stands on one's own two feet. May this book contribute to your process of awakening, liberation and transformation so that Divine love can manifest itself on Earth from the human heart.

Together in the heart

The Brotherhood and Sisterhood of Love and Light

Revelation 1

The commitment of the spiritual masters

The spiritual masters communicate their responsibility for Earth on an intergalactic level in collaboration with Humanity. Every individual is jointly responsible for activating the Divine spark on Earth. Energetic forms of consciousness are a part of this process. The effect of the crucifixion of Jesus on Earth's aura. List of questions of the spiritual masters for getting people into a personal spiritual process to help them connect more easily with each other.

Mary Magdalene, Jesus, Mary and other masters in the Brotherhood and Sisterhood of Love and Light: “We look at Earth from the outside. We have an interest in Earth. We are able to see and feel Earth's aura, its field of energy. We are able to see and experience the relationship between Earth and the Cosmos. We are aware of this relationship and also of the Cosmic processes on Earth. So we observe from this wider perspective. It provides a different frame of reference. Most people who function on Earth do not see this context and it is our task to create a link between their processes and this Cosmic framework. Everyone on Earth carries a Divine spark within but is not always aware of this fact. Because you are so focussed on daily events you are often in a kind of semi-conscious state. Sometimes shocks are required to wake you up:

events that turn everyday life upside down. Such as in the time of the solar eclipses or during certain natural disasters, social crises, wars, a panic on the stock exchange. Then you sit up and take notice and you suddenly see developments on Earth in a wider context. And the Divine spark is activated.”

Humanity and spiritual helpers together

Mary Magdalene, Jesus and Mary: “Everyone is able to take steps in their own awakening process. We hereby call upon you to 'wake up'. We have an immense shared task, namely to manifest the consciousness of Christ in every person on Earth. We do this together. It is not exclusively your task, nor ours. We are implementers belonging to a much greater intergalactic order that supervises developments in awareness at a Cosmic level. This order affords a harmonious and evolutionary policy with respect to tasks such as the migration of souls from one planetary system to another, the proper balance between various galaxies and solar systems, the exchange of awareness developments between various galaxies, coordinating genetic improvements, exchanging experiences at ecological and social levels, carrying out and coordinating projects – such as the project Planet Earth –, the distribution and reproduction of various life forms and species, monitoring various awareness zones, monitoring the well-being of and the care for various life forms, monitoring and providing a link between all sorts of life forms and the Almighty. This organisation has various levels of responsibility and tasks. The responsibilities are distributed perfectly. Each subsystem has its own management body that provides a link with the great intergalactic order and that adapts the tasks of the great intergalactic order to the order of the subsystem, for instance a solar system.”

Every human being also bears responsibility

Mary Magdalene, Jesus and Mary: “The various hierarchies mentioned above are reflected in every one of you. The aspects and tasks of the intergalactic order are repeated on a small scale throughout this solar system. There is an intensive exchange system between the various planets themselves and the Sun. We, the Brotherhood and Sisterhood of Love and Light are responsible for the connection between Earth and the Cosmic order. The Earth is a planet whose importance extends beyond the solar system. The importance of Earth is linked to an even greater project, namely allowing humans to experience the free-will zone and investigating whether they are able to become aware of their own Divine nature, after this has descended into matter and been incarnated on Earth. The importance of this process impacts the entire Universe. If you are able to make a success of this project, you will lift the entirety to a new dimension. If you do not succeed, Creation will undergo additional evolutionary cycles in order to solve this crisis. Everyone must be aware of his or her own responsibility in this. Yet both possibilities are a part of the Divine ‘game.’ Both roads ultimately lead to the same end result.

What will happen if you do succeed? Succeeding means that you will regain your Divinity. It means that you have the intention to let go of everything necessary to return to your heart. That you choose to open your heart to yourself, to your fellow human and to everything on Earth, to see through all sorts of power games and to connect lovingly with others. This is a process that starts on a small scale, in your own life, in your relationship towards yourself and your fellow human and in relation to society and the world. It begins with yourself. You will realise that it is a unique opportunity for every soul to occupy a human body and to live on Earth. But this is also accompanied by responsibilities.”

Other forms of consciousness

Mary Magdalene, Jesus and Mary: “Earth is currently in a state of flux. It is drawing near to a period of cleansing and purification. As a being, it has made itself available for this project and has been willing to provide physical forms for various kinds of souls, such as plants, animals and people. It has now come to a point of suffering because it senses how you treat each other and nature.

However, there are other forms of intelligence and consciousness that have linked their evolutionary processes to that of Humanity, making this evolutionary process even more complex. Examples of these forms of consciousness are energetic entities that are created and/or fed by collective emotions and thoughts and energetic forms of consciousness that come to us from other places in the Universe. They are fed by aggression, hard-heartedness, confusion and fear and they kindle these forces. These forms of consciousness must contend with something on Earth, just like you. They have a certain influence on the development of Humanity; you nourish them unwittingly. These forms become involved and feel committed when you call on them, however subtly. You do this through thoughts, wishes and statements. These thoughts, wishes and statements can attract either supportive powers or destructive forces. If you have negative thoughts towards someone you unwittingly call in certain invisible energetic entities that want to feed on aggression. You both tune into a certain wavelength, an awareness frequency, just like tuning into a radio station. In a manner of speaking, you switch on Radio Violence or Radio Love. By tuning into this wavelength you nourish that frequency, as it were. When millions of people engage in violence every day, each at their own level and in all forms imaginable, no matter how subtle, a violent field of energy is created that can manifest itself in the shape of wars, natural disasters or accidents.

Everyone on Earth is jointly responsible for all processes, both good and bad. If you regularly tune in to love, then it is this frequency that is nourished and stimulated.

By meditating and praying on a regular basis, you create an added source of light that will help matters tremendously. If you transform tension and discord in yourself as well, you will give your Divine spark increasingly greater leeway and you will contribute significantly to the collective process and to your own growth. Our message is: 'Become aware of your Divine spark. Learn how you function and discover what influence you have on your surroundings and vice versa.'

Jesus' time on Earth was important

Mary Magdalene, Jesus and Mary: "A very important process took place in the time of Jesus Christ. A group of highly evolved souls arrived on Earth to open up the way for the energy of Christ. Some acted in a human body, some operated from a subtle level. We, the Brotherhood and Sisterhood of Love and Light, came together at that time to participate in the history of Humanity in a recognisable physical form. Mary Magdalene and Jesus, Mary, Joseph and John are examples of this. Every one of us had a specific role. Everything was according to the Divine plan. While Jesus was being crucified a tremendous amount of light poured out from the purest energy level of the Almighty onto Earth (*see also Revelation 20*), raising Earth's aura to a higher vibration and increasing the awareness of Humanity."

Appeal and questions for man

Mary Magdalene, Jesus and Mary: “We would very much like you to cooperate with us. Start on the exercises contained in this book. Focus on yourself. By means of these questions we would like to encourage you to think of yourself and to work on yourself. It is our intention to start up a process that will bring you closer to your heart and that will tune you in to the light you carry in your heart. And to improve your relationships so that you can get closer to others and commit yourself to a greater extent. It is ultimately all about the connecting force of love. Love for yourself, love for others and love for God.

Take a good look at the following questions and let them sink in. Become aware of the feelings that each question arouses in you. Note down your answers on a separate sheet of paper.

- Do you have complaints of a physical nature?
- Is your lifestyle a healthy one?
- Do you feel good?
- Do you get enough rest?
- Do you feel any emotional stress?
- Are there any sources of inner pain and sorrow in your life?
- Are you happy?
- How are your relationships?
- Are your relationships supportive or restrictive?
- Are you a supportive or a restrictive factor for others?
- How do you contribute to society? Are you interested in social processes? Do they move you?
- Do you follow your calling?
- Does your work make you happy?
- Do you follow your heart?

If you wish, you can keep these notes so that you can compare them with the answers you give at a later date should you feel the need to ask yourself these questions again.”

Revelations of Mary Magdalene, Jesus and Mary

Jesus did not die for our sins – The true meaning of the crucifixion – Mary Magdalene has always been Jesus' partner – Mary states clearly that she did not conceive her child Jesus as a virgin and that sexuality is sacred – Humanity carries the trinity of the Father, the Son and the Holy Spirit in itself and man is Divine. This amazing book contains these and many more controversial Revelations of Mary Magdalene, Jesus and Mary. 'The Human Divinity Part 1' comprises many new teachings of the spiritual masters for every person on Earth.

The 25 revelations are so innovative that you will need time to give them a place in your head and heart. For instance, Mary Magdalene explains her special role for mankind. Mary states that Jesus was conceived through physical contact between Joseph and herself and that there is no such thing as the holy virgin. Jesus divulges that sins do not exist in his view. They also state that every person chooses his or her own life and thus his or her own parents prior to conception and that the human soul incarnates regularly on Earth.

'The Human Divinity is not only a book that provides exclusive insights, it is also an exercise and 'feel' book. Through the exercises and prayers you can sense a clearer picture of yourself in order to connect with the spiritual world and thus create an energy of the heart that substantiates your own Divine nature and opens your heart in order to become a more loving person for yourself, for your fellow man and for the world:
